Ensuring compliance of your airport pavements

your requirements, our expertise

Maintenance and monitoring your airport pavements : a key safety factor

SUEZ intervenes throughout the project value chain in accordance with international requirements and best industry practices to guarantee the safety of users:

- ▶ friction characteristics measurement
- ▶ water-based rubber removal
- ▶ markings removal
- ▶ degreasing aircraft stands
- ▶ complete traceability of waste
- ▶ pavement surface monitoring and diagnostics
- ▶ PCNs calculation
- ▶ aircrafts admissibility verifications
- ▶ works recommendations
- ▶ technical appraisal for assessment of water-based rubber removal and adherence measurement processes
- ▶ training in the use of such processes, equipment and tools
- ▶ advice and guidance in the purchase and maintenance of adherence measuring instruments

A multilingual team

SUEZ by your side throughout the project

4 key stages

1 RIGOROUS UPSTREAM PREPARATION

- ▶ prior contact of our experts with the client
- ▶ assessment and analysis of history of the surfaces conditions
- ▶ development of a customized solution

2 A PROFESSIONAL PROCESS AND QUALITY MONITORING

- ▶ resources (human and material) matching the physical and environmental constraints
- ▶ quality control during all the operations
- ▶ operating constraints factored in

3 PERSONALIZED BRIEFING

- ▶ on site for urgent responses
- ▶ suitable corrective measures proposed, if necessary

4 A POST-INTERVENTION MONITORING OFFER

- ▶ development of a roadmap
- ▶ consulting activities for organizing a maintenance programme with a clearly-defined budget
- ▶ advice in calculating and interpreting the results

Why choose SUEZ as partner ?

sustainable partnership

4 workshop that can be mobilized simultaneously

operating constraints factored in

rationalized use of water

traceability of all solid waste

work done by experts

guaranteed protection of personal health and safety

high efficiency rubber removal
